**FIG. 5**

FIG. 6 is a schematic diagram of a database system 600. The database system 600 includes an external database (DB) 114 and a data processing unit 602. The data processing unit 602 is configured to process data from the external database 114. The data processing unit 602 includes a data processing module 604 and a data storage module 606. The data processing module 604 is configured to process data from the external database 114. The data storage module 606 is configured to store data processed by the data processing module 604.
